

A wider selection of vehicles tailored just for you.

AUTOTURN

With the subscription licenses, users receive content updates to the software regularly. This content release includes new and updated 102 standard vehicles and 42 manufacturer-based vehicles, providing you with more accurate design vehicles for your swept path analysis.

This content release includes new and updated regional standard vehicles from various European and East African countries as well as vehicles conforming to US design guidelines.

Additionally, there are new and updated manufacturer vehicles for the City, Construction and Transport vehicle libraries.
